DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to an apparatus for detecting the presence of a workpiece, classified in class 425, subclass 135.
- II. Claims 4-5, drawn to a method of detecting the presence of a workpiece, classified in class 264, subclass 40.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus, such as one that does not require a passageway to be between two surfaces, but instead included a passageway ending in a porous medium.

A telephone call was made to the office of Frank Manak III on 19 November 2002 to request an oral election to the above restriction requirement, but the phone number provided (330-528-3004) was said to be out of service.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
